"HOME CONFORT" FURNACES.

Wrought Steel, NO GAS, Malleable Iron, No Dust, Very Little Fuel. No Leaky Joints.

No one can say that the time was not ripe for a new furnace. The days of brittle, porous, cast iron furnaces are numbered. In ever branch of manufacture cast iron is being driven out by wrought iron and steel. Every bridge that goes down in a wreck of lives and property is found to have cast iron members. Every bursting cannon which slays its friends rather than its enemies is made of east iron. Every leaky furnace which poisons a household with its noisome gases is found to be made of the same cheap, unreliable material Improved methods of manufacture have made steel and iron plate, of first quality, less expensive than east iron formerly was, and it is plainly in accord with progress in other directions that there should be progress both in design and the material of furnaces for warming our homes, churches and schools.
